

System 288

Description

Flexible metal modesty panel that allows better privacy underneath the table top. Table tops are made of 18 mm High Pressure Laminate (HPL).

All the modules are integrated with frame-base connector that allows easy removal and installation on the base deck.

Wires are routed through the side of the storage module to the bottom of the base structure which are then supported using wire trays.

The storage module side cover can easily be removed to install the wires.
